

## Site Carpentry Apprenticeship Level 2

This Level 2 apprenticeship is for those looking to gain trade skills and a qualification while working on a construction site. As an apprentice, you will need to be employed (our recruitment team may be able to help you find an employer) and you will study one day per week at college for two years to gain your Level 2 qualification.

Site carpentry focuses on woodwork essential to a construction site and includes fitting flooring, roofing frame installation, partition wall construction and stair building to name but a few. There is also timber frame erection, window fitting and some on-site modifications needed for structures.

We offer a range of full-time site carpentry and bench joinery qualifications to get you started on a career in wood trades in construction.

### □ Ideal if

You are a practical learner and are interested in a career in construction and carpentry.

### □ You'll need

Four GCSEs at grade 3 or higher, including English and maths.

### □ You'll learn

How to work independently at your own pace guided by industry experts. All of our tutors possess a high degree of skills and knowledge gained from their vast experience of working in the industry.

### □ Expect

As an apprentice, you will need to be employed and will study one day a week at college for two years to gain the Level 2 apprenticeship.

### □ You'll love

Spending 80% of your time learning practical skills in our purpose built workshops.
