

## Vehicle Accident Repair - Paint Repair

Motor vehicle body repair and paint is a very specialist area, where demand for skilled technicians is high and salaries can be very rewarding. The skills are transferable to other sectors, so you could take your qualification and move into the boat painting industry, where you could work around the world. To become a qualified technician you must complete the Level 1 and 2 qualifications. At Level 2 you can choose to specialise in body repair or paint repair. Funding is available for school leavers for three years, so you could choose to do both paint and bodywork courses. We offer full Mechanical, Electrical and Trim (MET) training to provide you with the best start in the workplace.

### □ Ideal if

You would like to pursue a career as a paint repair specialist.

### □ You'll need

English and maths GCSEs at grade 4 or above, plus a relevant Level 1 qualification.

### □ You'll learn

Specialist paint techniques for a wide range of vehicles. Working in our training garages, that include a MIPA spraying booth system, you will learn a broad range of paint techniques with a variety of materials.

Areas of expertise you will build on include:

- Basic panel preparation processes
- Different paint application techniques
- Filling and repair of panels in preparation for paint
- Essential health and safety best practice for working in sealed painting bays and working with hazardous materials.

### □ Expect

Work on a variety of vehicles, use the latest paint products and techniques and gain experience through hands-on activity and to be assessed through practical and theory tests.

### Key facts
